Summary Report on Carriage Test of USAGM's secretary CC-3
on 19 May 1952

1. Object of Test: Assessment and Control.
2. Procedure: Standard
3. Estimated Reliability of Test Results: "Reliable", in the scale of "reliable", "fairly reliable", and "unreliable".
4. Summary of the Test Results: Subject appears to be the person she claims to be and not an enemy agent or serious criminal. Subject appears to have told the main truth about her past and appears to be acting from motives friendly to our interests. Subject appears to have something on her mind, perhaps of a personal nature, regarding German connections, not apparently of vital importance. Subject appears to be secure.
5. Appraisal of Subject: An intelligent, capable woman who appears to feel life is fairly hopeless but is prepared to fight to the end. Has high standards of conduct and appears (like USAGM) to be in flight from the sordid milieu in which she finds herself. Slight trace of anemia. Can only be led, not driven.
6. Remarks and Recommendations: It might be well eventually to find out with what German families, and where, she maintains connections. This is something she would probably bitterly resent, so that caution is advisable in any inquiries. Further carrying would be inadvisable, as a very strong impression was made on subject to serve as control, and any further work on her (except at very long intervals) would clearly be regarded as an indignity.
